

Green Umbrella™ Shield & Enhance™ is an environmentally friendly densifier that deeply penetrates and chemically reacts with concrete to create a dust-proof floor surface that is harder, denser and exceptionally resistant to the damaging effects of water and salt with up to 91% chloride prevention. Green Umbrella Shield & Enhance is specially engineered to enhance the natural beauty of polished or dyed & polished concrete, providing a deeper and richer appearance to finished surfaces. A clear, odorless solution, Green Umbrella Shield & Enhance does not require rinsing and removal, saving considerable time and money while eliminating hazardous waste disposal issues significantly reducing your company's impact on the environment.

Green Umbrella Shield & Enhance is specially formulated for use in manufacturing & light assembly plants, warehouse/distribution centers, food service operations, parking decks, garages, airports, hospitals and any other areas where concrete surfaces require protection from water, salt, oils and dust.

SAFER FOR THE ENVIRONMENT

Green Umbrella Shield & Enhance is a responsible alternative for professionals concerned about the environmental impact of densifiers and other concrete treatments. Unlike many traditional products, Green Umbrella Shield & Enhance is compliant with all state VOC standards and contains no sodium or potassium which can contribute to Alkali Silica Reaction (ASR). The surface created by Green Umbrella Shield & Enhance combines the properties of a densifier with the protection of a silane -- meaning the substrate will stain less and wear longer, reducing maintenance frequency and extending the life of treated concrete and masonry.

SUPERIOR FEATURES

- *Repels water, oil and shop chemicals while providing 91% chloride prevention*
- *Darkens and enhances beauty of natural concrete color*
- *Increases hardness and density; adds dust- and stain-proofing properties*
- *Requires no rinsing & disposal and will not gel on surface — can be allowed to air dry*
- *Excellent resistance to efflorescence and fungi & mildew growth*
- *Stands up to heavy abrasion and foot traffic while providing excellent slip resistance*

EASY TO APPLY – SIMPLE TO MAINTAIN

Green Umbrella Shield & Enhance is extremely easy to use — simply apply with a Productions Team-recommended sprayer for coverage of up to 400 sq. ft. per gallon. Because of their reduced porosity and superior resistance to staining, surfaces treated with Green Umbrella Shield & Enhance are easy to maintain by auto-scrubbing or damp mopping.

DIRECTIONS FOR APPLICATION

Green Umbrella Shield & Enhance should be mixed well before using. For best results, air temperature must be above 40° F. New concrete should be fully cured for seven (7) days and free of all potential contaminants.

1. Apply Green Umbrella Shield & Enhance with a Productions Team-recommended solution spreader or sprayer.
2. Distribute product with a broom or T-bar applicator with Nylafoam head to ensure uniform coverage, keeping the surface wet for a minimum of 20 minutes.
3. Allow product to air dry. Green Umbrella Shield & Enhance will not gel on surface and does not require rinsing.
4. Remove any un-reacted material with a broom after product has dried.
5. For superior acid & oil resistance, apply a coat of Green Umbrella Microfilm to treated surface.

ROUTINE MAINTENANCE

- Thoroughly sweep all debris from floor
- Auto-scrub or mop with Productions Team-recommended, non-corrosive cleaning products. Do not use acidic or citrus-based cleaners.
- Propane burnish with Green Umbrella maintenance pads to restore gloss
- Re-apply every 1-2 years for maximum appearance enhancement
